statements carry within themselves their own proof or disproof.

"That is to say, if the papers now in the hands of the University of Copenhagen contain any considerable portion of the boreal observations which Captain August Loose says he worked out by the reverse route, no farther north than the Grammattan Inn. in Bronxville, N. Y., the deduction is that Dr. Cook feit no conneces in the adequacy of his own proofs.

Checks On Ills Own Dais,

"If, on the contrary, the Copenhagen

the adequacy of his own process.

Checks on Ills Own Dais,

"If, on the contrary, the Copenhagen records show that Dr. Cook made no evident use of the calculations Captain Leose says he supplied, it would be fair 14 assume that he accepted them only as checks on his own data. The inquiry will then revert to its first status: Are the original observations of Dr. Cook sufficient?"

Asked flatly if he had or had not withdraw from Dr. Cook's affairs, Mr. Wack said: "This is not the time for an announcement. It might be thought I had deserted Dr. Cook in his need. He may be desirious in a sanatorium, or on the ocean, unable to defend himself."

A close friend of Mr. Wack reiter-

self."

A close friend of Mr. Wack reiter-ated, however, that Mr. Wack had long ago decided to close dealings with a client who did not keep his counsel informed of his intentions or move-

cilent who did not keep his counsel informed of his intentions or movements.

To this phase of the situation, Mr. Wack made this contribution:

"In Cook," he he said, "his disappeared of his own volition, and not by the suasion of his friends, I last heard from him by telephone on Thesday, November 23: I had seen him personally two days before.

Last night Dr. Cook's friend, Charles Wake, confessed to me that he had not the faintest idea where the doctor mow he, and that he had not heard from him since Tuesday, November 23;

"My very argent letters to the doctor have remained unanswered, although they demanded a reply from his since Tuesday, nowember 4;

Mr. Wake, however, did receive a letter from Mrs. Cook, on December 6, faited December 4, and posted December 5, in Brooklyn, asking him to discontinue all expenses on the doctor's disturted ascent of Mount McKintey.

"These affidavits bearing on the doctor's disputed ascent of Mount McKintey.

"These affidavits the doctor had originally intended to take with him to Europe, where they could be available for the University of Copenhagen in desired."

Europe, where they could be available for the University of Copenhagen it desired."

Motives of Capitan Loose, Others of Dr. Cook's friends granted to-night that Capitan Loose consulter freely with him and even occupied rooms adjaining his at the Grammatan Inn. Whether this propinquity served as an opportunity for co-operation merely or for collusion, is a point on which not even Capitan Loose cared to pronounce positively. The capital, however, went freely into his own motives this afternoon.

"I went to Dr. Cook," he said, "thinking I could help him. A short talk convinced me he was ignorant of some of the essentials of navigation. My task enlarged, but that was no question for me to debate so long as I was paid. Now that the payments have eased and the doctor has disappeared I speak out.

"I supplied the figures. They were gratefully received. What use was made of them is bound to appear."

"At first I considered it at least likely that Dr. Cook hid got near the pole," said capital Loose, "say to eight-nine degrees, or within sixty miles of the pole. Even list observations would have given him that accuracy. Later I was forced to change that Online. Sight of Land.

"A person not especially accurate might have thought himself at the pole when only the proposition of the pole when only the proposition of the pole when only a proposition of the pole when only the proposition of the pole when only a proposition of the pole when only the proposition of the pole when only the proposition of the pole when only the proposition of the pole when only a pole of the pole when only the proposition of the pole w

that Dr. Cook was never out of sight of simid.

"Dr. Cook never allowed me to inspect his original records, or, indeed, any more of them than has been published in the newspapers."

Captain Loose said that the writing down of seconds in Dr. Cook's reports of his observations did not show "a skilful attempt to deceive." The limits of error were so great that the recording or seconds would not be of the slightest value in adding accuracy, declared the captain.

"Still, of courag" he nitided, "Dr. Cook rould have looked at his instruments, seen the seconds and put them down conscientiously, it is ignorance of their lack of importance,"

Forecasts Cook's Defense,

Reported in Many Places.

To-day Dr. Cook was seen in Brooklyn. He was recovering from a nervous break down at a remote sanatorium in Maine; he was 'no topplangen; he was in Philadelpina, and it was eyen semored that after all he was at Mullion's, near White Plans, all at the same time. Never in the history of exploration has an explorer made such a puzzling escape from friend and critic alike as the doctor appears to have done.

Investigation at Wells, Me., where Dr. Cook was reported yesterday morning to be recaperating in a sanatorium, indicated that he was not and never nad been there. On the other hand, Dr. T. S. Pitt, superintendent of the sanatorium, who was in Boston yestorday, relicrated that the explorator was at his institution.

Forecasts Cook's Defense,
As to whether he thought it possible for Dr. Cook to declare now that these calculated observations by Captain, Loose were simply for comparison of his own, Captain Loose said:

"Dr. Cook will probably say this. But why did he need any such calculations and reckonings backward as I made for him?

"Why did he need any one to make calculations for him if he is a may gator and mathematician himself, and if he went to the pole and took careful observations on the way to and from the pole?"

WILL KEEP SOUTHERN YARDS

Many Establishments Will Not Be Abandoned for Present.

WASHINGTON, D. C., Decomber 5.— Secretary of the Navy Meyer is not in favor of abandoning any of the Southern navy yards, at least until after the completion of the Panama

The secretary's views on this subject were made known to-day to a delegation of prominent business men delegation of prominent business men of New Orleans, who called upon him and protested against the abolishment of the navy yard there. When urged to give New Orleans a greater share of work in the repair of sings than heretofore, Mr. Meyer promised the matter would be considered carefully. Nenator McEnery, Representative Estophial, Mayor Behrmann and W. P. Ross acted as spokesmen for the party.

EARLY STILL IN WASHINGTON

EARLY STILL IN WASHINGTUN

Presenger Rates Too High for Trip to
New York.

WASHINGTON, D. C., December 9.—
Troubles seem to pile up ahead of John
R. Early, "the lepen." He expected to
leave Washington to-day a free man
to go to the Rockefelier Institute for
Medical Research in New York for
examination.

When the railroad companies were
approached a new objection bobbed up
in the rates they intend to charge for
Early's transportation. The Pennsylvania Railroad decided to furnish a
baggage car to Early for \$113.

To-day, Early drew all his back pension, \$196.80, which is all the money
he has in the world, he says, and he
doesn't want to pay nearly all of it
to get to New York. Early's counsel
then turned to the Baltimore and Ohlo
and negotiations with that company
are now in progress.

Meanwhile, Early is still quarantined
on the government reservation here.

Fire to Southern Shops.

Fire in Southern Shops.

COLUMBIA, S. C., December 2.—Fire in the car shops of the Southern Railroad here to-day caused damage amounting to \$25,000. The building was completely destroyed and several passenger coaches which were there for repairs shared the same fate. The flames threatened other buildings in the vicinity, but, after a hard fight, the firemen checked the fire.

OBITUARY

Funeral of Mrs. Hindes.

The funeral of Mrs. Carrie Hindes will be held from her mother's residence, 1722 North Twenty-second Street, this afternoon at 3 o'clock. The burial will be made in Oakwood Cemetery.

Customs of People of Holland,

The last of the series of three lectures in the Thomas lecture course was given in Richmond College chapel last night before a large audience by Professor James Howard Gore, Ph. D., of Washington. The subject was "In the Walge of the Pigrims." Dr. Gore traced the growth of the Puritans spirit of religious independence in England and Holland, and the exodus of the Puritans to other lands for religious freedom. The various places connected with their persecution were shown in reproductions of famous old prints; their departure for the new world; their heroism and their settlement of New England.

The first lecture of the series was on the general history of Holland, closing wifn a splendid tribute to Queen Wilhelmina, whom Dr. Gore sensows personally. He has made seven trips to Holland, during which he has gained an intimate acquaintance with Dutch customs and traditions. Dr. Gore speaks Dutch finentity and counts many prominent people of that nation as his friends. The pictures used in this series of lectures were taken by him.

"War With the Sea."

The second lecture was on the "War of Holland With the Sea," in which it was made clear how destructive as well as how helpful the sea has been to Holland's development. Large tracts of land redeemed from the water have become fertile farms, while shipping of one kind and another has made Holland's development.
